

Smell Better Hawaii
is proud to be partnering with Betterair USA
To create safer indoor air quality for

HOMES

HOTELS

CONDOS

OFFICES

SCHOOLS

CHURCHES

GYMS

Betterair's Technology disperses into indoor air a unique microscopic blend of probiotics that safely and effectively clean inanimate allergens and pathogens such as:

Pollen

Dust mite Allergens

Pet Dander

Mold Spores

Roach Allergens

Bacteria

Virus

Resulting in a Hypo-allergenic safe zone free of allergic triggers.

Continuous usage of Betterair helps eliminate
Allergy symptoms, Asthma symptoms, Pet allergies, Bad odors and exposure to bacteria and virus's.

What Betterair does for your home or building:

- Resetting and re-balancing of the indoor micro biome to mimic the outdoor environment which is the healthiest for our bodies.
- Reducing the potential for the transmission of infectious diseases by minimizing the presence of infectious pathogens within the indoor environment
- Purification of the indoor air by attacking the root cause of indoor air pollution... The reduction in the presence of pathogens and allergens on surfaces and objects which are then propelled into the air. Fewer pathogens on surfaces and objects result in fewer pathogens in the air.
- Creation of a hypoallergenic safe zone free of organic allergens fostering an environment conducive to the development of a healthy immune system

Is it safe?

- Betterair's probiotics are certified as safe for humans, animals and the environment by Made Safe the Premier certifying agency in the US
- Parent tested Parent Approved has granted Betterair it's five stars rating for the elimination of organic allergens
- Betterair's probiotics have successfully passed all 9 EPA safety tests in conjunction with our EPA registration application as a bacteriostat and fungi-stat.

Does it work in Covid 19 Corona Virus?

Betterair's proprietary blend of environmental probiotics (Enviro-Biotics) has been tested against Feline Calicivirus a surrogate for Corona Virus and one of the hardest virus's to inactivate. The application of Enviro-Biotics by Betterair exhibited a significant reduction in FCV that similarly infects the respiratory system on surfaces by X 10,000 fold within hours. Testing for EPA list N certification is underway.
